

CORE CAPABILITIES

Integrated Electronic Enclosures

- + Rugged and airworthy chassis production
- + MIL-STD-461 and DO-160 EMI mitigation
- + Ground, Air, and Deployable platform applications
- + ARINC, rackmount, panels, transit case integration

Engineering & Technical Support

- + Organic, on-site engineering design and analysis
- + Board design, testing, and production
- + Airworthy power supply designs

Flexible Production Models

- + Build-to-Print
- + Build-to-Specification
- + Kitting services
- + Cradle-to-grave: prototype, FAI, full-rate production, RMA and long-term sustainment support

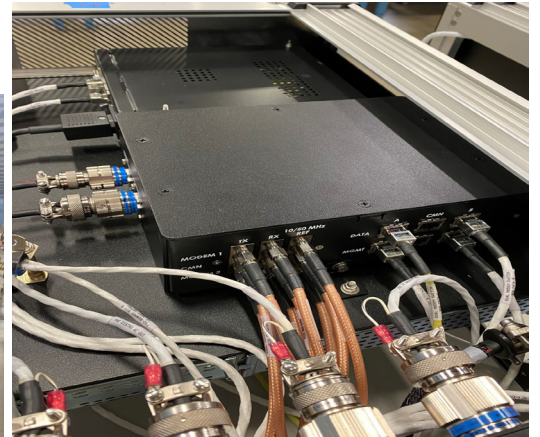

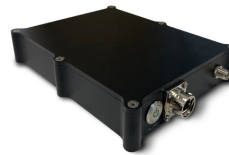

Quality and Compliance

- + MIL-STD and DO-160 testing: EMI and Environmental
- + IPC/WHMA-A-620 certified
- + IPC-J-STD-001 certified
- + Clean and controlled ESD manufacturing space
- + DER and ODA availability
- + AS9100 with ISO9001 company

Mission-Critical Enclosures

SelectTech manufactures highly reliable integrated electronic enclosures for civil and defense platforms. Tested to rigorous MIL-STD and DO-160 standards, they are engineered to persist in the most demanding environments.

As a turn-key partner, SelectTech will work with your team on design, prototyping, first-article inspection, conformity, production, and sustainment to ensure full lifecycle support.

RELIABILITY IS NOT NEGOTIABLE
