

# SELECTTECH

# WIRE HARNESS & CABLE FABRICATION

## CORE CAPABILITIES

### Precision Harness Fabrication

SelectTech manufactures high-reliability electrical harnesses ranging from simple assemblies to full tip-to-tail aircraft harnesses and cables supporting civil and defense platforms.

We combine engineering depth, controlled manufacturing processes, and rigorous quality standards to deliver mission-critical interconnect systems for airborne or rugged ground applications.

### Complex Harness Manufacturing

- + Tip-to-Tail aircraft harnesses and cables
- + Multi-branch, power, signal, RF, and data cables
- + Ground, Air, and Deployable platform applications
- + Rugged circular, ARINC, commercial, and others
- + Meet MIL-STD and FAR25 requirements

### Engineering & Technical Support

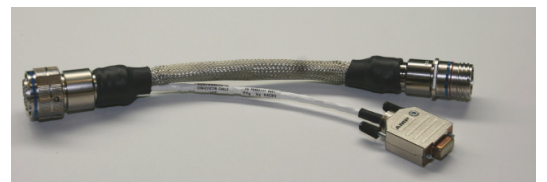

- + Organic, on-site engineering design and analysis
- + Custom harness development for unique platform requirements
- + Reverse engineering and legacy system sustainment
- + EMI/RFI suppression

### Flexible Production Models

- + Build-to-Print
- + Build-to-Specification
- + Kitting services
- + Prototype through full-rate production

### Quality and Compliance

- + SAE AS50881-compliant fabrication
- + IPC/WHMA-A-620 Class 3
- + IPC-J-STD-001
- + Clean and controlled ESD manufacturing space
- + AS9100D with ISO9001:2015

**RELIABILITY IS NOT NEGOTIABLE**
